

Personal and Household Cyber Protection Insurance

Home networks and personal devices are extremely vulnerable to cyber-attacks, especially as the correct settings, back-ups and anti-virus software are often compromised by human error. We can minimise your exposure with a tool that scans the dark web for breaches of your data, monitors your family's devices, generates your cyber risk score and a personalised preventative action plan.

This is an ideal solution for businesses as it ensures holistic cyber risk mitigation, as well as an innovative employee benefit. Personal Cyber cover is an obvious value-add for domestic customers worried about hacking and ransoms, as it closes the gap between today's risks and the traditional coverage of a home and contents policy.

STATISTICS

CYBER CRIME

59% of New Zealanders have been a victim a cybercrime

1.3 million

New Zealanders experienced cybercrime in 2019 alone

30%

of New Zealanders have lost money from cyber crime

Personal and Household Cyber Protection Insurance

DYNARISK CYBER PROTECTION

The DynaRisk Ultimate plan provides vulnerability and breach scanning for 10 household devices, 10 emails, and monitoring of credit cards and phone numbers

Cyber Security Score

Similar to a credit score, DynaRisk's Cyber Security Score indicates how safe you are online by assessing over 70 personal risk factors. It's simple - the higher your score, the safer you are.

Data breach monitoring

DynaRisk's intelligence team recovered over 882 million breached and leaked data records in the 2nd quarter of 2020 alone. They constantly monitor the Dark Web and will notify you immediately if they discover your personal data has been compromised and advise you of next steps.

Personalised improvement plan

A personalised dashboard with your Cyber Security Score, a list of tailored actions designed to help improve your online safety.

Cyber security threat alert & education

Training on how to spot phishing scams, educational emails about the latest cyber threats and alerts when a new breach or threat has been discovered.
